25X1A

Dear Bob:

At the last project meeting you recommended that we prepare a listing of required equipment from United States Air Force Equipment Component Lists. The enclosed tabulation represents basic requirements for project photographic support in the [ ] to be erected [ ]

25X1  
25X1

The first nine items are major equipment, some of which we wish to have delivered to our own facilities on "as soon as possible" a basis for evaluation and modification. We were unable to find a milling machine in the lists available. The ninth item, therefore, describes a commercial unit representative of the type which would be satisfactory.

Those items not now listed will be selected at a later date from ECL lists or will be scheduled for fabrication or supplied through our own facilities as soon as specifications are complete.

Items 1 through 4 should be delivered to our facilities as soon as possible. Please note that we are in receipt of Item 2, one EH6A processing unit. After evaluation and in event we are assured the unit to be a satisfactory one for [ ] use, it is probable we will request one more unit for use at our own facilities during project duration to train operators and have the capability of cross checking photographic process performance.

1. 6740-597-1489 Processing unit, photo. film, elec. oper. type B 5A.
2. 6740-317-4662 Processing machine, photographic film and paper type EH 6A.
3. 6740-664-4111 Drier, photo. film, port, aerial roll type film, type EL-1A.
4. Dayton Processor, roll type film.

Items 5 through 9 should be delivered to the [ ] at [ ] prior to March 1, 1961.

25X1A

5. 6740-242-9175 Print washer, photo., max print size, 11 in. wd, 14 in. long, 115 v, Sig type PH-240-A.
6. 3416-186-4061 Lathe, eng. bench mtg., solid bed, 3/4 hp, 220 v, AC, 60 cyc, 3 ph (RS 8100-440000).

7. 3419-223-1982 Grinding and buffing machine, utility floor mtg., 5/8 in. spindle, 1/2 hp, 110-220 v, AC, 60 cye, 3 ph (RS 8100-334500).
8. 3413-529-0812 Drilling machine, upright, floor mounting, 5/8 in. drill cap., 1/2 hp, 220 v, AC, 60 cye, 3 ph, 345-3205 rpm.
9. Milling machine, equivalent to Bridgeport Milling Machine Model "J", 220 v, AC, 3 ph, 60 cye, 9" x 32" table.  
R-8 Spindle taper.  
1 set collets 1/8 through 3/4  
#1 Bridgeport 5" swivel vise.  
#5 Bridgeport Right Angle Attach.  
#2 Bridgeport Offset boring head  
Cross travel stop  
#1, #2, #3 shell mill holders R8 shank  
#14 Jacobs Precision Drill Chuck

We would be overly optimistic to presume that our list is at present a complete one and will be pleased to discuss substitutions with you for any items which might not now be available. We plan to submit additional requirements in summary lists as soon as these lists are established.

25X1A Items on the following pages are required by March 1, 1961 at the [ ] to prepare for subsequent photographic support as required during project test and operation.

Items 1 through 5 are repeated under Processing Equipment and Items 6 through 9 under Maintenance Equipment in the equipment breakdown lists.

Yours very truly,

25X1A
